

Reliable technology for your recycling success

Our saying

*We are passionate
mechanical engineers –
an innovative company
with heart and soul.*

Our centerpiece:
the ballistic separator

conveyor screw

OUR PRODUCTS

From the initial idea, through design, production, and testing to assembly – at SUT, you get everything from a single source. Winding and stuffing is reduced to a minimum due to our unique separating design.

conveyor technology
including safety
technology

steel construction

turnkey machinery

For more than 20 years, Sinawehl GmbH Umwelttechnik has specialized in the planning and production of special machines – with a clear focus on efficiency, resource conservation and quality.

Whether automation, prototype construction, or smart resource utilization – we don't just produce, we think ahead.

INNOVATION MEETS SUSTAINABILITY

Sinawehl Umwelttechnik 

About us

For over 20 years, Sinawehl Umwelttechnik (SUT) has established itself internationally as a reliable specialist for innovative machines and complete systems for recyclable material processing. We focus on three core areas: resource management, processing technology, and conveyor technology.

We provide our customers with comprehensive support – from consulting through planning and production to turnkey commissioning. Our solutions stand for efficiency, sustainability, and the highest quality.
